How to Use this Report

Discovering Diversity Profile® Group Report

The *Discovering Diversity Profile*® Group Report will help focus diversity efforts based on the needs of the group or organization.

The information in this report moves through the four key areas of diversity: **Knowledge, Understanding, Acceptance, and Behavior**. Each area is important in shaping attitudes toward diversity.

Knowledge is the foundation for all the other areas. Information about other people is necessary before we can understand someone else's feelings, thoughts, and motives. Only then can we begin to know how our own feelings, thoughts, and motives impact others. **(Pages 4-5)**

Understanding builds upon our knowledge base. Understanding is the intellectual recognition that we are the way we are because of our cultural backgrounds and influences. **(Pages 6-7)**

Acceptance is an expression of the feelings we develop about ourselves and about diverse groups. Some level of understanding must come before achieving any genuine acceptance of other people. This is particularly true for those with different physical abilities, customs, values, or sexual orientation. **(Pages 8-9)**

Behavior refers to the ability to interact with different people. It indicates our ability to perform tasks with comfort and ease in our interactions with people who are different from us. **(Pages 10-11)**

On the next page you will find the **Group Diversity Comfort Level Grid**, which provides a snapshot of your group in the four key areas of diversity development. On the pages following the Group Diversity Comfort Level Grid, group level data for all of the items in the diversity profile are displayed. The group level data includes information on how the group responded to each item, the mean score for each item, and the Group Comfort Level for each category. You may choose to focus on the items with the lowest means in order to better address the greatest needs of the group as a whole.

Please note that all information in this report is anonymous. It does not reveal individual scores or item responses.

Group Diversity Comfort Level Grid

Discovering Diversity Profile® Group Report

The Group Diversity Comfort Level Grid pictured below provides a snapshot of your group in the four key areas of diversity development. Your Group Mean shows the average score for your group in each category as well as your group's comfort level, ranging from Level 1 (lowest) to Level 3 (highest).

Group Size: 5

| Area | Your Group Mean | Level 1 | Level 2 | Level 3 |

Knowledge: Stereotypes

Discovering Diversity Profile® Group Report

Your group mean for Stereotypes is 31.4, which is in Level 2. On the average, this group probably attempts to draw upon and consider previous contacts and relationships before characterizing others. They are likely to be increasingly open to dealing with co-workers as individuals. The group tends to recognize their biases and prejudices toward others and may begin to question their assumptions about others.

Below are the group level data for each of the items in the Stereotypes area of the *Discovering Diversity Profile*®. The table includes:

- A key that shows in which direction the item is scored (D = Disagree, A = Agree). For all items in this section, disagreement suggests higher levels of diversity knowledge; agreement suggests lower levels of diversity knowledge.
- The percentage of the group's responses at each level of the rating.
- The mean (or average) score for the group. A lower mean suggests the specific areas where this group may want to focus their diversity work.

| Item | Key | Strongly Disagree | Disagree | Agree | Strongly Agree | Mean |
|--|-----|-------------------|----------|-------|----------------|------|
| People with disabilities are fragile | D | 60% | 40% | 0% | 0% | 3.6 |

| Group Mean for Stereotypes | | | | | | 31.4 |

Knowledge: Information

Discovering Diversity Profile® Group Report

Your group mean for Information is 26.2, which is in Level 1. On the average, this group appears likely to draw conclusions in the absence of factual data about specific groups or individuals. They probably need more accurate data to create less biased opinions or feelings and develop better understanding and working relationships. The group may be unaware of the connection between diversity and organizational effectiveness.

Below are the group level data for each of the items in the Information area of the *Discovering Diversity Profile®*. The table includes:

- A key that shows in which direction the item is scored (D = Disagree, A = Agree). **For a D item**, disagreement with the item reflects higher levels of diversity knowledge, agreement reflects lower levels of diversity knowledge. **For an A item**, agreement with the item reflects higher levels of diversity knowledge, while disagreement reflects lower levels of diversity knowledge.
- The percentage of the group's responses at each level of the rating.
- The mean (or average) score for the group. A lower mean suggests the specific areas where this group may want to focus their diversity work.

| Item | Key | Strongly Disagree | Disagree | Agree | Strongly Agree | Mean |
